

GOODMAN BENTLEY COVERT VIDEO/AUDIO 2GB PEN RECORDER

The Covert Video and Audio recording pen is a very versatile surveillance tool. It is built into a high grade fully functioning pen that conceals a 1 mega pixel colour video camera with a recorder built right into its top. Simply push one button to start recording. This amazing product has a 2GB memory built into it. The camera is positioned immediately above the pocket clip to afford the best viewing angle when positioned in a jacket or shirt pocket. The unit provides fast downloads of the evidence direct to your PC through the USB connection.

It has a built-in rechargeable battery that can be charged simply by plugging the unit into any USB port. This little camera is a very effective surveillance tool and simple to use. The battery will last for three hours when fully charged. The onboard memory allows you to take up to two hours of video with this unique state-of-the-art 2 GB unit.

Pen Specifications:

- This is the world's first pen-based video recorder using a micro-DVR in black or silver.
- The highly sensitive microphone can obtain audio from a 15 square metre distance.

- Video format is CIF 352 x 288 AVI format.
- Read and write data faster: 900 K/700K bytes / sec
- Size: 14.5 x 1.5cm
- Weight: 30 gms
-

Operating Instructions:

- To TURN ON the pen just simply click the button on the top of the pen momentarily and a yellow light will appear on the top hole at the reverse of the pen which will be in standby mode. A second click of the button, will change the light to blue which will indicate the pen is recording.
- To either put the pen into STANDBY mode just click once and the yellow light returns, be patient at this stage as it takes a second or two to close the video/audio files. To shut the pen down hold the button down for at least three seconds.
- USB charging. Charging is indicated by the top yellow light blinking.
- Once charging is complete the yellow light stops blinking.
- Please note: The second small hole below the hole that shows the two yellow and blue lights is a reset button. If for some unknown reason the unit does not respond place a pointed implement carefully into the hole at an angle and gently locate the press button and reset the unit. If this should not help recharge the pen to ensure it is fully charged.
-
