

GOODMAN BENTLEY WEAPON MOUNTABLE GREEN LASER

The Weapons green laser system has been designed for mounting to all weapons systems. It comes complete as shown above which includes the under barrel bracket and pressure pad switch or end cap switch all made from black anodised aircraft aluminium. The range of this particular laser is 1500 metres, which makes it a very small but versatile integral part of any weapons system for target acquisition..

TECHNICAL SPECIFICATION

- Model: GREENLASER-04
- Material: hard aluminum
- Exterior surface treatment: black anode sclerosis
- Switch: a rat tail + tactical point touch a switch
- Battery: CR123
- Wavelengths: 532 nm • Power : 20-25 mW
- Range: 1,500 metres
- Rstart-up time: ≤ 3 Secs
- Voltage: DC 3.7V
- Temperature: 0 °C \sim +35 °C
- Spot diameter: 6 M \leq Φ 10 m

LASERS ARE DANGEROUS AND SHOULD NOT BE SHONE INTO THE EYES
